

Aspiring Data Scientist | B.Tech Computer Science (Final Year)

EDUCATION

B.Tech in Computer Science and Engineering — Sri Venkateswara Institute of Technology, 2022–2026
(Expected), CGPA: 8.42/10

Senior Secondary (Class XII), CBSE — Delhi Public School, 2020–2022, CGPA: 91.2%

TECHNICAL SKILLS

Programming Languages: Python, SQL, R (Basic)

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Machine Learning: Regression, Classification, Clustering, Decision Trees, Random Forest

Tools & Platforms: Jupyter Notebook, Git, GitHub, MySQL, Excel, Power BI

Concepts: Data Cleaning, Feature Engineering, Data Visualization, Exploratory Data Analysis (EDA)

PROJECTS

Customer Churn Prediction System | Python, Pandas, Scikit-learn, Matplotlib

- Built a machine learning pipeline to predict telecom customer churn using a dataset of 7,000+ customer records.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to identify key churn indicators.
- Trained and compared Logistic Regression, Random Forest, and Gradient Boosting models, achieving 85% accuracy with Random Forest.
- Visualized model performance and feature importance using Matplotlib and Seaborn.

House Price Prediction Using Regression | Python, NumPy, Pandas, Scikit-learn

- Developed a regression model to predict housing prices based on 12+ features including location, area, and amenities.
- Applied data preprocessing techniques such as handling missing values, outlier removal, and one-hot encoding.
- Implemented Linear Regression and XGBoost, improving R-squared score from 0.71 to 0.89 after feature engineering.

Sales Data Visualization Dashboard | Python, Pandas, Power BI, SQL

- Designed an interactive dashboard to analyze retail sales trends across regions and product categories.
- Wrote SQL queries to extract and aggregate data from a relational database for reporting.
- Presented insights on seasonal sales patterns that could inform inventory planning decisions.

INTERNSHIP EXPERIENCE

Data Science Intern — Nimbus Analytics Pvt. Ltd.

May 2025 – July 2025 (Remote)

- Assisted the analytics team in cleaning and preprocessing large datasets (500K+ rows) using Python and Pandas.
- Built exploratory data analysis notebooks to support a customer segmentation project for a retail client.
- Automated a weekly reporting script using Python, reducing manual reporting time by approximately 40%.
- Collaborated with senior data scientists to validate model outputs and document findings for stakeholders.

CERTIFICATIONS

- IBM Data Science Professional Certificate — Coursera (2025)
- Machine Learning by Andrew Ng — Stanford Online / Coursera (2024)
- SQL for Data Science — Coursera (2024)
- Python for Data Science and AI — IBM (2024)

ACHIEVEMENTS

- Ranked in the top 10% among 1,200+ participants in a college-level Data Analytics Hackathon (2025).
- Published a technical blog on 'Feature Engineering Techniques for Tabular Data' with 2,000+ reads on Medium.
